SUBJECT: REMOVAL AND/OR RELOCATION OF MATERIALS STORED IN OU13 IHSSs 117.1, 117.2, 158, 186, and 197 - MFM-012-93

I would like to schedule a meeting with you or the person in your organization that I should work with to schedule the movement of materials stored in Operable Unit No. 13 (OU13) individual hazardous substance sites (IHSSs) 117.1, 117.2, 158, 186 and 197, to facilitate the non-invasive field sampling activities that are to begin later this spring. Unlike the actions currently underway in OU 10, these materials may not have to be removed, but they will have to be shuffled around to allow for these activities. These activities include a visual inspection, radiation (using HPGe detectors) survey, soil gas surveys, and a limited amount of surficial soil sampling, shallow soil profiling, and asphalt sampling.

We should also discuss other related field activities that may be affected by material storage in the other industrial area OUs. I would like to get together as soon as possible, hopefully no later than the first week of April. Field work is scheduled to start in mid-May. I suggest that we plan to spend an hour or two walking around these IHSSs to see first hand what limitations to consider in the planning process. I will make myself available at your convenience. Thank you for your help.
